

~~a~~ Abstract Document

~~a~~ {Abstract}

~~a~~ {Objective} The objective of the present invention lies in shortening the compost preparation period by a simple method and preventing contamination of underground water.

Abstract of the Disclosure

~~a~~ {Constitution} Film for accelerated compost fermentation which is characterized in that it comprises a composition in which the chief component is polymer containing polyether chains as structural units, and where the water vapour permeability thereof is at least 300 g/m².24h, the oxygen permeability is at least 1,000 cm³/m².24h.atm and the carbon dioxide permeability is at least 10,000 cm³/m².24h.atm; together with film for accelerated compost fermentation which is characterized in that the aforesaid film is reinforced by means of a nonwoven material or net.
